He is the founder of the Maternity Hospital Montaigne in Châteauroux where were practiced the Lamaze Method and Haptonomy with the guideline « Give birth at Montaigne like at home ».

The Maternity Hospital Montaigne posted less than 3% of epidurals and of cesarian sections, with one of the lowest rates in Europe of neo-natal mortality and morbidity.

A sharing time with him and other protagonists, broken by films of births which occurred in Montaigne, will show us that a different approach and a different experience of Birth are possible, even at the hospital.
